ABSTRACTED-PUB-NO: WO 200200388A

**BASIC-ABSTRACT:**

**NOVELTY** - The unit has at least one machine tool (36), which has a machine bed (1) connected to a stand (2) and a working spindle (10) that is moved by a working spindle movement unit (13) in vertical x- and horizontal y-directions to hold a tool (16).

**DETAILED DESCRIPTION** - A work piece support (29) with a clamp device (32) for a work piece (15) is arranged in a working chamber (14) arranged in the z-direction in front of the working spindle on the machine bed. At least one loading and unloading device (41) is arranged in the z-direction in front of the machine tool on the other side of the working chamber from the working spindle. A transport track (38) to support the loading and unloading device is arranged in the x-direction in front of the machine tool. The loading and unloading device has at least one work piece movement device (54). The work piece movement device or a work piece support (29) slides in the z-direction to move a work piece.

**USE** - To machine work pieces.

**ADVANTAGE** - Loading and unloading is quick, accurate and cheap.

**DESCRIPTION OF DRAWING(S)** - The figure shows a side view of a tool machine with a loading and unloading unit.
